Willits/Howard Forest Station	17501 N. Hwy 101, Willits	459-7414	May 1 – November

May 1 – November: These agencies issue burn permits valid only during the declared fire season. An Air Quality permit must be obtained from the Mendocino County Air Quality Management District (MCAQMD) or your local fire agency during the winter burning season.

November – April 30: These agencies issue Inter Agency/Air Quality burn permits valid only during the winter burning season.

Year Round: These agencies issue Inter Agency/Air Quality burn permits valid year-round. You will not need to obtain a separate permit from Air Quality.

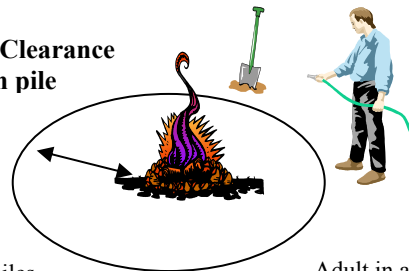

BURNING PREPARATIONS - The following conditions must be met:

1. Materials must be approved combustibles only and reasonably free of soil and surface moisture from rainfall.
2. Materials must be arranged to promote rapid combustion with minimum smoke production.
3. Materials must be dried at least the minimum recommended length of time as follows:
 - a. Trees and branches over 6 inches in diameter – 60 days.
 - b. Prunings, brush and branches less than 6 inches in diameter – 15 days.
4. Aerate leaves to dry them prior to burning. **Please do not burn wet leaves.**
5. Burn piles are to be ignited as rapidly as possible to avoid smoke nuisance.
6. All vegetation must be burned on the property where it was grown.

Burn Barrels are illegal in the State of California

**10-foot Minimum Clearance
on all sides of burn pile**

Fire Safety Requirements for Burn Piles:

1. Maximum 4-foot diameter pile size for residential piles.
2. Minimum 10-foot clearance from all flammable material.
3. Adult in attendance with shovel until fire is Dead Out.
4. Water supply at burning site.

Adult in attendance with shovel and hose or portable water supply until fire is "Dead Out".

OPEN OUTDOOR BURNING INFORMATION FOR ALL AREAS OF MENDOCINO COUNTY

Burn Forecast Recording: (707) 463-4391

PRIOR TO ANY OPEN-OUTDOOR BURNING, FIND OUT WHICH FIRE AGENCY IS RESPONSIBLE FOR YOUR AREA.

The declared "fire season" is May 1st through approximately November 1st. "Fire season" is declared by the California Department of Forestry and Fire Protection. The "winter burning season" is approximately November 1st through April 30th.

REQUIREMENTS OF THE CALIFORNIA DEPARTMENT OF FORESTRY AND FIRE PROTECTION AGENCY (CDF):

The California Department of Forestry and Fire Protection requires a burn permit for all 'outdoor debris' burning on lands under its jurisdiction – (state responsibility area or SRA). A CDF burn permit is required on May 1st of each year and remains a requirement until the end of the declared fire season (approximately the end of October).

CDF does not require a permit during the winter burning season. (Approximately November through April 30th). Please refer to the Mendocino County Air Quality Management District requirements for winter burning.

CDF and local fire agency burn permits are subject to temporary or permanent suspension due to critical fire weather conditions. Please be aware of the countywide Burn Ban beginning July 1st (or earlier if necessary) of each year and extending through the end of the declared fire season.

A CDF or local fire agency permit will suffice as an Air Quality permit from May 1st until the end of the declared fire season. After the end of the declared fire season and until May 1st, you will need to obtain an Air Quality permit from the appropriate agency listed on page 2.

A Smoke Management Plan may be required by the Air Quality Management District for any burning done during fire season and winter burning season if it involves more than 10 acres (broadcast) or more than 50 tons of fuel. One may also be required for less than 10 acres or less than 50 tons of fuel if the project is located in a smoke sensitive area (populated). Please contact Air Quality for more information.

REQUIREMENTS OF THE MENDOCINO COUNTY AIR QUALITY MANAGEMENT DISTRICT (MCAQMD) 707/463-4354

OFFICE LOCATION: 306 E. Gobbi Street, Ukiah Ca. 95482

A written Air Quality / Burn Permit is required year round. This requirement may be met by obtaining a burn permit from a designated fire agency or the Air Quality Management District. Refer to the back of this form for more information on obtaining a burn permit.

Inter Agency Burn Permits issued by the Air Quality Management District are subject to a fee of \$10.00.

The District does not require a permit for the burning of **single piles 4' x 4' or smaller** (dooryard) (residential), of yard waste and prunings per day from the immediate vicinity of a single family or two family dwelling. However, your local fire agency or CDF may require a dooryard (residential) burn permit. If you are unsure, please call before burning.

For the best possible burn, dry vegetative matter should be burned completely between the hours of 10:00 am and 3:00 pm in any single day.

Although Tribal Reservation land is not subject to the requirement for burn permits, violations of emissions regulations (e.g. burning unapproved combustibles or burning on a 'No-Burn' day) are enforceable.

ALL OPEN OUTDOOR BURNING IS PROHIBITED IN MENDOCINO COUNTY WITH THE FOLLOWING EXCEPTIONS:

AGRICULTURAL: **The growing of crops and the raising of fowl or animals.**

Range Improvement: To remove unwanted vegetation

Forest Management: To remove forest debris

Wildlife Management: To enhance a wildlife or game habitat

Wildland Vegetation Management: Prescribed burning

NON-AGRICULTURAL: **Vegetative Matter Only**

Single or Two Family Residential Dwellings: The disposal of vegetative matter on the property where grown

Property Development: The disposal of vegetative waste on property that is being developed for commercial/residential use

Fire Hazard Reduction: Disposal of vegetative matter to reduce fire hazard on property

Right-of-Way Clearing: By a public entity or utility company

Levee, Reservoir and Ditch: Maintenance

THE BURNING OF POSION OAK AND OLEANDER IS RESTRICTED AND MAY BE SUBJECT TO ADDITIONAL PERMIT CONDITIONS.

REMEMBER, YOU CAN NOT BURN: Household garbage, cardboard, paper products, clothing, plastic or rubber materials, Styrofoam, construction/demolition debris, milled lumber, motor oil, batteries, tires, tar paper, animal waste or any other non-vegetative materials.

POSSIBLE EXEMPTIONS FROM PERMITTING (Please contact your nearest fire agency or CDF for more information):

1. Fires used only for the cooking of food for human consumption, warming, or ceremonial fires. (Approved combustibles only).
2. Fires set by any public officer for the prevention of an imminent fire hazard or the instruction of public employees in the methods of fighting fires.
