

# Weathering the Storm:

Find out how Low Impact Development can lower infrastructure costs, increase your project's marketability, and enhance protection of the environment

## Topics to include:

- ❖ Evolving stormwater management requirements on the state and local level
- ❖ Construction: Erosion and Sediment Control Best Management Practices
- ❖ Low Impact Development: Why, when, where, and how-to
- ❖ Vegetative treatment Techniques
- ❖ Selection and implementation of Best Management Practices

Each workshop will rendezvous in the field to observe LID techniques on the ground and discuss lessons learned

You will learn from real live practitioners and experts!  
Presentation by:

Mona Dougherty, P.E.: North Coast Regional Water Quality Control Board  
 Paul Kieran: North Coast Regional Water Quality Control Board  
 Dennis Slota: Mendocino County Water Agency  
 Maria Cahill: Green Girl Land Development Solutions  
 J.R Ashcraft: Rau & Associates
